Comments:

- This session did not really address the title. The major focus & discussion was around Pam’s experience, which was awesome! It was great to see how the WBAS could be utilized. Change the title to seeing WBAS in action or something along those lines or be sure to spend most of the time on the time on main topic. There was no real connection with the database. I was looking far more of compare & contrast of the two.
- Still confused about the grading element. You can’t get away from it.

What kind of follow-up do you think you need in order advance your state's efforts in health education assessment? What could the CCSSO project staff do to assist you?

- Further small group discussion about where we are going.
